Best Practices with using Video clips in Blackboard

Do not upload videos to your Blackboard section. When videos are uploaded additional plugins must be downloaded by students to view them directly.
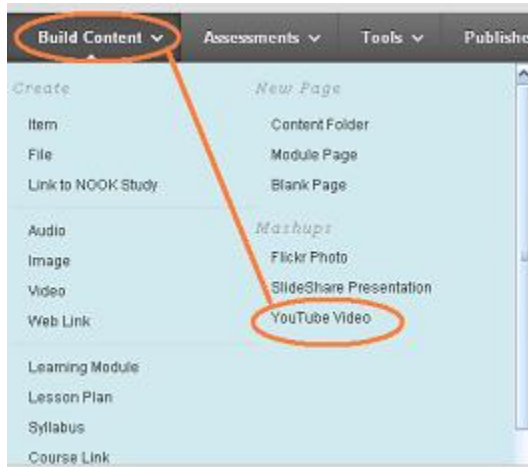

Option: Embed YouTube (Mashup) Videos within content areas of course

Step 1

✓ Click a Course **Content button** in the menu.

   Tip: If button not available click on the + sign above the menu with edit mode On to add content area.

✓ Mouse over **Build Content**, then click **YouTube Video.**

Step 2

✓ Type a search term or the direct URL in the search box, then click Go.

✓ Click **Select** under the video you want to embed.

Step 3

✓ Scroll to item 2 – **Mashup Options**, and change view to Embed Video.

✓ Click Submit - Your video should now appear in Course Content.
